FOREWORD

The third annual Directory of School Programs for Visually Handicapped Children is a continuation of the activities of the U.S. Office of Education in collecting and disseminating timely and useful information pertaining to the education of handicapped children. The rapid development of school programs for visually handicapped children necessitates a directory of this kind to facilitate communication among programs. Furthermore, the directory serves as a ready reference for responding to the many requests from professional and national organizations, students, and parents for information about school programs for visually handicapped children.

Only schools and school systems which employ one or more special teachers to work full time with blind and/or partially seeing children are listed. Indication of type of handicap served reflects the way in which children were reported classified for instructional purposes. If, for instance, a program does not serve functionally blind children, but does serve those classified as blind for some purposes but educated as partially seeing, it is listed as serving only partially seeing children.

Information concerning a program may be obtained by writing the superintendent of the administrative unit or special school. Additional information may be obtained from State education agencies.

The Office of Education acknowledges the cooperation of local and State agency personnel who were responsible for supplying the data presented.
